December 20, 2023

To the NDAAEA Program Recognition and Awards Committee:

It is my absolute pleasure and honor to verify that Greg Endres is in good standing with North Dakota Association of Agriculture Agents (NDAAEA) and the NACAA. On behalf of our membership, we extend our full support to Greg's nomination for the NACAA Hall of Fame honor.

In my professional life, I have not seen an Extension professional who is exceptionally knowledgeable and thoroughly committed to their profession as Greg. He is undoubtedly one of our top most, well respected Agronomists in the state of North Dakota. He is looked upon for advice on various crops and weed control by Extension agents, crop advisors and industry Agronomists. He has hosted several successful Extension and research programs to address the needs of farmers across the state. From Greg's CV, you will quickly realize how much of an asset Greg has become to NDSU Extension. His list of presentations, extension and research publications, training and education programs speak to his exceptional career.

Apart from being an outstanding Extension Agronomist, Greg has been an active member of NDAAEA and NACAA serving several leadership roles as past president of the NDAAEA, chair and vice chair roles in several committees, attending several NACAA meetings and presenting posters at national meetings. Greg is also very active within his community and church.

We are so proud to have Greg as part of NDSU Extension and believe that he is **well deserving** of receiving the 2023 NACAA Hall of Fame honor.

Respectfully Submitted,

Anitha Chirumamilla

2023-2024 NDAAEA President
